

Dr. Rishavdeb Patra MS, MCh

Pediatric Surgeon & Urologist

Lymphangioma in Children

Know the Signs

Lymphangioma is a non-cancerous lymphatic malformation that appears as a soft swelling, often in the neck, face, or armpit.

- ➔ *Soft, painless swelling*
- ➔ *Present at birth or develops in early childhood*
- ➔ *May gradually increase in size*
- ➔ *Can affect breathing or swallowing if large*
